

MASTER OF SCIENCE
IN MONEY
AND FINANCE

FACULTY OF ECONOMICS AND BUSINESS

The Master of Science in Money and Finance (MMF) is an innovative joint venture between the Department of Money and Macroeconomics and the Department of Finance, both located in the House of Finance.

With 5,000 students of business administration, economics, and business education, our faculty is not only one of the most prestigious, but also one of the largest faculties of business and economics in Germany. Graduates enjoy an excellent reputation in the national and international business world, as indicated in numerous rankings (e.g. Wirtschaftswoche, Handelsblatt).

Goethe University's Master of Science in Money and Finance offers promising students from all over the world an intellectually stimulating and challenging program. It has been designed with the vision of establishing itself as a leading master's program integrating studies in monetary economics, macroeconomics, and finance. The program serves as a gateway to high profile jobs in private or central banking, insurance, and other financial services.

ABOUT THE FACULTY

- Commitment towards high quality of teaching (AACSB accreditation)
- Wide range of modules taught in English (knowledge of German is not required)
- Practice-oriented teaching by accomplished adjunct faculty from the business world and close cooperation with high-profile companies
- Excellent study conditions on the most beautiful and modern campus in Germany: state-of-the-art lecture halls, teaching rooms, libraries, and computer suites
- Combination of intense supervision and independent academic study

WHY STUDY MMF IN FRANKFURT?

The program provides a unique combination of money, macroeconomics, and finance – much better tailored to the banking and financial sector than single-field master's programs in economics or finance.

Moreover, we combine core and elective modules taught by academics with topical courses taught by high-level practitioners from central banks, including the ECB, and the private sector.

Frankfurt, as one of the leading financial centers in Europe with two central banks and numerous private banks and insurance companies, provides multiple opportunities for internships and job entry.

STUDY ABROAD

We encourage you to study one or two semesters abroad. Our International Office provides comprehensive advice during all stages of your studies abroad. You can choose between the following options:

- Study one semester abroad at one of our high quality **partner universities** in Europe and worldwide.
- Choose the **QTEM program**: study at one of our QTEM partner universities and receive a certificate that proves your extraordinary quantitative skills.
- Study abroad as a **free mover** at a university of your choice.

PROGRAM STRUCTURE

SEM.	MODULES
1	<ul style="list-style-type: none">• Fundamentals of Macroeconomics• Fundamentals of Microeconomics• Fundamentals of Econometrics• Capital Markets and Asset Pricing• Corporate Finance and Valuation
2	<ul style="list-style-type: none">• Elective module Money• Elective module Finance• Elective module• Supplementary module• Supplementary module• Seminar Money / Seminar Finance
3	<ul style="list-style-type: none">• Elective module Money• Elective module Finance• Elective module• Elective module• Seminar Money / Seminar Finance
4	<ul style="list-style-type: none">• Thesis seminar• Master's thesis

Fundamental modules provide the basic tools for advanced courses and thesis work.

Elective modules provide advanced specialized knowledge of various areas. Students choose their electives according to their future career plans.

Supplementary modules apply academic theories to real-world problems and are typically taught by practitioners.

Seminars encourage students to conduct their own research as a preparation for the master's thesis.

The **master's thesis** is a major research project by which students can demonstrate their ability to deal independently with a complex problem.

ADMISSION

Applicants must hold a bachelor's (or equivalent) degree in economics or business administration. Exceptionally strong candidates with a quantitative background will be considered, even if their field is not directly related to economics or finance. Moreover, you may apply once you have completed at least 80% of your undergraduate credits.

All applicants must register through our online application system.

Please check our website for details on the application process.

APPLICATION DEADLINE

May 15
