Equation (25b) on p. 711 of the published version of the paper should read as

$$\varphi_t = \frac{(2 + \hat{\rho}_{t+1})\zeta_{t+1}}{(2 + \hat{\rho}_{t+1})\zeta_{t+1} + (1 - s_{t+1})(1 - \lambda)(1 + \hat{\rho}_{t+1})}.$$

We thank Edward Davenport for pointing this out to us.
